Hazards & Risk

Removing all hazards and risks from this activity is neither desirable nor feasible. The hazards and risks associated with this activity are being managed to acceptable levels in line with the current codes of practice in New Zealand. Our systems are accredited by the "Adventure Mark" certification scheme in accordance with the 'New Zealand Safety Audit Standard for Adventure Activities Act 2017'.

Below are some of the hazards and risks that may be encountered while **Rock Climbing & Abseiling**. Your Instructor/guide will brief you on specific hazards and risks at the appropriate time or place:

Rockfall, fall from height, steep ground, narrow and technical access tracks, slippery tracks and rocks, vehicle accident.

The following natural hazards exist in our area of operation:

Earthquake Risk: multiple fault lines exist throughout the South Island of New Zealand, including the Alpine fault (major fault line) Castle Hill fault lines as well as the Christchurch/Port Hills fault lines.

Wildfire risk: in summer months the Port Hills are Canterbury Plains are prone to wild fire events

Programme delivery.

I understand that Outdoor Education New Zealand Limited is delivering this activity.

Hazard & Risk Acknowledgment

I understand that there are hazards and risks associated with this activity/tour and I have been given the opportunity to seek clarification of these risks and hazards from my guide/instructor.

I understand that some risks and hazards can only be prepared for, and it is impossible to remove or reduce the likelihood of an incident occurring due to factors that are out of our control or unpredictable.

I am choosing to participate in this activity/tour, understanding that there are hazards and risks involved and I am happy with the level of risk and hazards involved in this activity/tour.
